

SAP : SIMULATION IN ANAESTHESIA SERIES

Medical Simulation Workshop Module 2 :

SIMULATE to up-skill Paediatric Anaesthesia and perioperative emergencies.

Date: 12th May '24 | Venue: Simulation Lab, Bharati Hospital, Pune | Total Seats: 30 Seats Only

Paediatric patients are NOT small adults!!

No wonder Paediatric Anaesthesia is one of the most demanding fields of Anaesthesia.

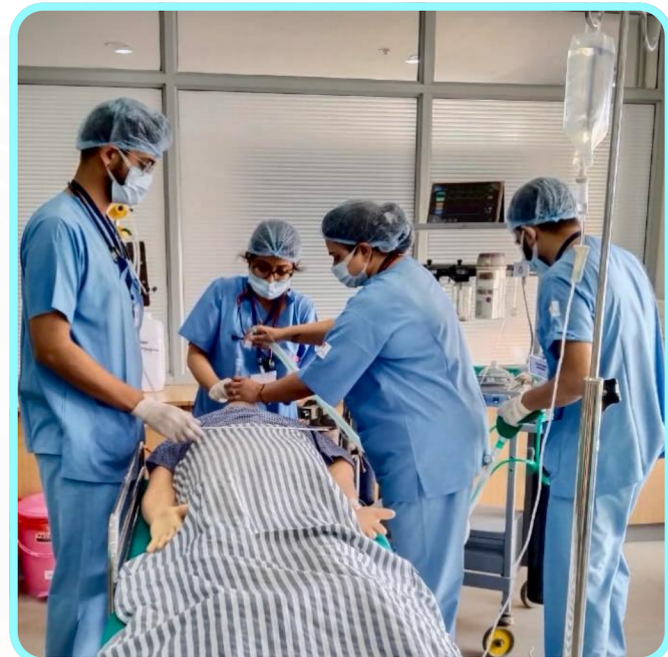

Let's prepare ourselves to handle these "most vulnerable" and adorable patients with proficiency and utmost care.

KEY HIGHLIGHTS

- Hands-on skills stations
- High fidelity simulation
- Case based discussions
- Algorithmic management of emergencies
- Crisis Resource Management
- Comprehensive pre-reading material

High Fidelity Simulation Scenarios

- Intraoperative loss of expiratory tidal volume under GA.. What could it be?
- Unexplained tachycardia with hypotension after a block.. What could be the cause?
- Major surgery with sinking vitals.. How to manage?
- Paediatric trauma. How do I manage?

Who Should Attend:

- Anaesthetists interested in Paediatric Anaesthesia
- Simulation enthusiasts for basic experience and development of simulation training

Applied for MMC Points*
